

Dear Sirs

Re – Guardian Staff Alarm System.

Ashworth Hospital in Liverpool, operated by Mersey Care NHS Trust is one of three High Secure Mental Health Hospitals in England.

A decision was made in 2004 to install the Guardian Staff Alarm System throughout all buildings within the High Secure Site to enhance safety to both staff and patients in the event of an incident.

The systems have been in operation since May 2005 and report within the ward, to adjacent wards and to a Central Control centre.

The systems have proven to be a great success with the hospital staff and with the maintenance dept.

The Trust currently has a rolling ward refurbishment programme, where we are taking the opportunity to upgrade and enhance the alarm system in conjunction with Guardian.

If you require further information or detail, please do not hesitate to contact me via e-mail or via the details shown below.

Kind Regards

Martin Ford
